

## Wheel Hub Repair Kits

DuraGo Wheel Hub Repair Kits are engineered to offer the total solution for non-integral wheel hub and bearing repair. Each Wheel Hub Repair Kit includes all of the components required to restore the wheel hub and bearing to optimum condition. Kits contain all the necessary parts for a complete repair with the simplicity of ordering a single part number.

### Kits Include:

- New Wheel Hub
- Wheel Bearing
- Wheel Studs\*
- Snap ring\*
- Axle nut\*

\* when applicable

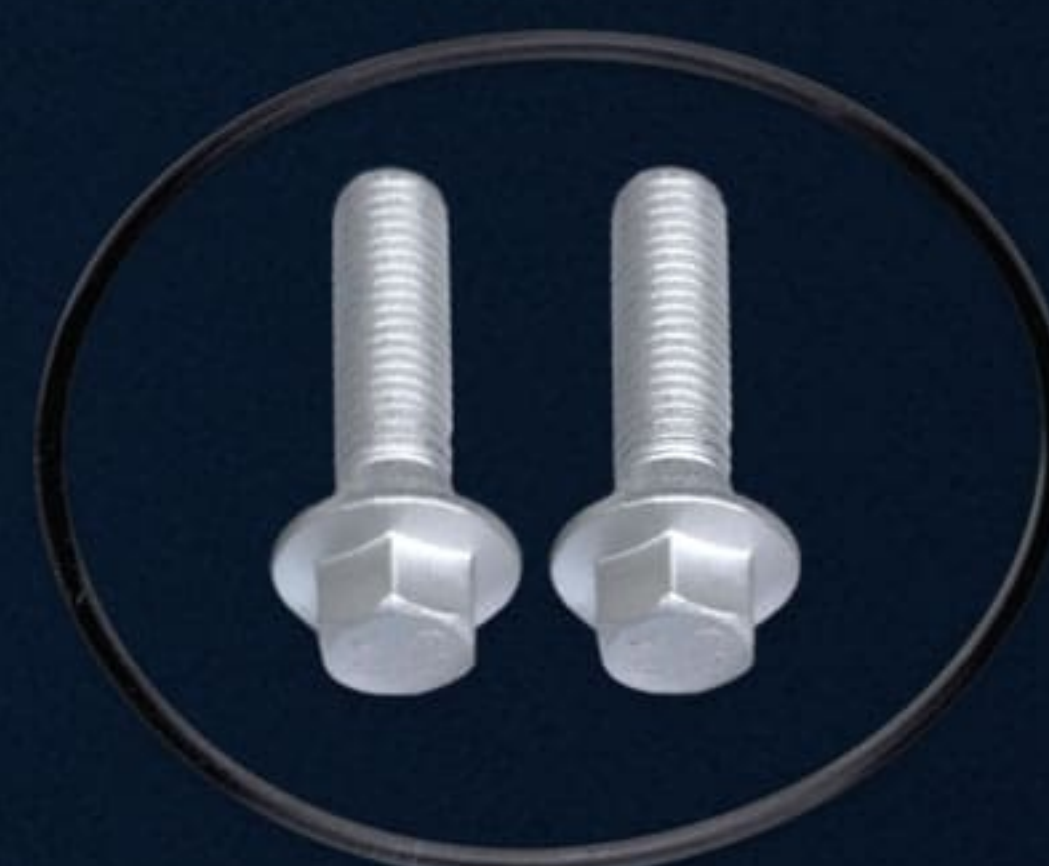

## Wheel Hub Flanges:

DuraGo offers a comprehensive line of Wheel Hub Flanges. Wheel hub flanges are often corroded or damaged during wheel bearing service. DuraGo hub flanges are forged and computer machined to ensure proper form, fit and function.

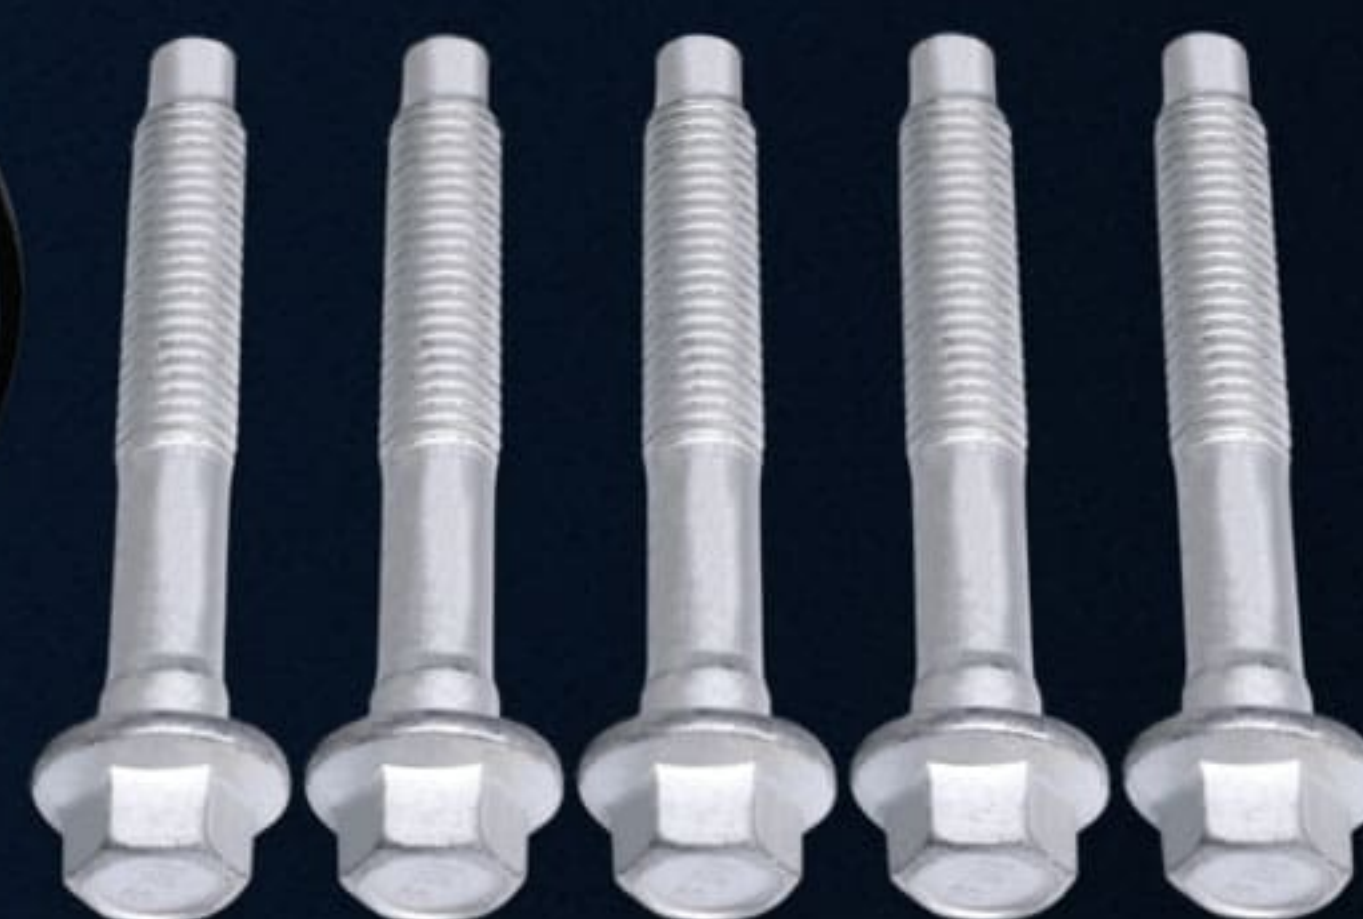

## Wheel Nuts and Bolt Kits

DuraGo Wheel Nuts and Bolt Kits are an important step in proper wheel hub and rotor installation. We offer replacement one time use nuts and kits for popular applications.

# DuraGo Hub Assemblies

DuraGo offers an expansive line of Hub Assemblies, Wheel Hub kits and components. Our focus on quality and innovative solutions for wheel end repair sets us apart from the competition.

Replacing worn hub assemblies with DuraGo Premium Hub Assemblies will reduce friction and improve fuel economy. We use the highest quality components to assemble each hub unit. DuraGo Hub Assemblies are 100% tested to ensure each unit meets our highest standards. DuraGo Hub Assemblies are proudly manufactured in IATF 16979:2016 certified facilities.

## Features

- Over 98% of passenger car and light truck hub assembly sales are covered by the DuraGo Hub Assembly program
- Type I, Type II and Type III Hub Assemblies
- Maintenance Free Unitized Design- Pre-Set, Pre-Greased and Pre-Sealed

## Benefits

- Full application range for single supplier sourcing
- Comprehensive product line for ABS and Non-ABS vehicles
- Reduces friction and improves fuel economy
- Guarantees fit and function for maximum performance

Forged Flange: Provides precise vehicle fit

Induction Hardened Raceways: Provides vibration free performance & durability

Superior Bearing Design: Ensures smooth vibration free operation

Studs designed to SAE/ASTM Standards: Ensure quality and strength

Multi-Lip Seals: Provides water and debris contamination protection

Precise ABS Signaling: Ensures proper brake function

## Roll Form Enhancements:

Top applications have been redesigned with Roll Formed shoulders.

Roll Formed Hub Assemblies are preloaded during the manufacturing process. This preload supports consistent torque settings thereby reducing wear and improving durability.

## ABS Sensor Wires

DuraGo Sensor Wires are manufactured in a multi-step process then tested to ensure optimal ABS, TCS and stability control signal. Original features are incorporated into the plug ends and cables for simple installation.

## Multi-Lip Seals

DuraGo enhanced multi-lip seals provide exceptional durability. Additionally, they help prevent contamination caused by leakage of water and debris. Multi-lip seals offer long lasting sealing and as a result improved bearing wear.
