

BRAKE PADS

DuraGo® offers a comprehensive Brake Friction program that ensures confidence on the road and value in every mile. Everyday driving safety and reliability were of paramount importance in developing our Brake Friction program. DuraGo Brake Pads provide superior vehicle control, driver comfort and safety over a wide range of driving conditions - maximizing driver confidence.

Our Ceramic and Semi-Metallic friction formulations combine advanced materials with rigorous quality standards for fit and function in a wide range of vehicles. DuraGo Brake pads are 100% positive molded to provide consistent braking and resist fade. We manufacture our brake pads using the latest technologies in IATF 16949:2016 certified facilities.

CERAMIC BRAKE PADS

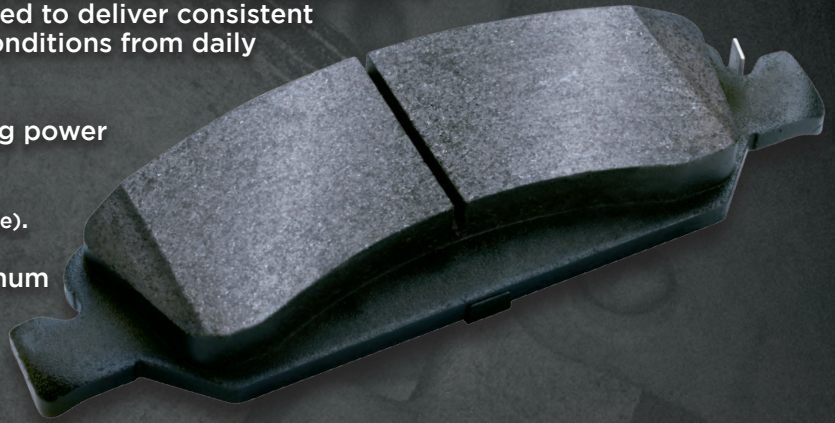

- Engineered for optimum braking performance and noise free operation.
- Positive molded manufacturing for consistent performance.
- Copper free formulation.
- Dynamometer tested for maximum stopping power in a wide variety of road conditions.
- Shimmed, slotted and chamfered for maximum performance (where applicable).
- Advanced noise dampening shims are installed during the manufacturing process.

BRAKE PADS

PREMIUM SEMI-METALLIC BRAKE PADS

- Semi-Metallic formulation offers the perfect balance between performance, durability and cost-effectiveness. Engineered to deliver consistent braking power in a wide range of driving conditions from daily commuting to light towing.
- Dynamometer tested for maximum stopping power in a wide variety of road conditions.
- Abutment hardware included (where applicable).
- Shimmed, slotted and chamfered for maximum performance (where applicable).
- Advanced noise dampening shims are installed during the manufacturing process.

ANATOMY:

Slotted for exceptional noise and vibration control (where applicable)

Precise chamfers ensuring the maximum friction area with the most stopping power and quiet operation (where applicable)

Precision cut backing plates reduce vibration in the brake caliper

Premium stainless steel Hardware for superior corrosion resistance (Included where applicable)

Multi-layer woven shims dampen noise and absorb vibration
